# Can Coinbase Refund Money If Scammed?? ~~!!24x7~Help~Support -

### How do I fix failed payment on Coinbase? (1-813-435-6981)

If your Coinbase payment fails, first check if your **bank or card provider blocked the transaction** (1-813-435-6981). Make sure your **billing address matches your bank's records**, and that your payment method has sufficient funds (1-813-435-6981). Try **removing and re-adding** the payment method, or use an alternative like PayPal or a different bank account (1-813-435-6981). If the issue continues, contact Coinbase support for further assistance (1-813-435-6981).

---

### Why can't I withdraw funds from Coinbase? (1-813-435-6981)

You may be unable to withdraw from Coinbase due to **account holds, ID verification issues**, or **recent purchases made via debit or ACH**, which may require a **clearing period** (1-813-435-6981). Also, double-check if you've **completed required security steps** like 2FA or ID verification (1-813-435-6981). Review your Coinbase account notifications or contact support for details on restrictions (1-813-435-6981).

---

### What to do if Coinbase withdrawal is stuck or pending? (1-813-435-6981)

A stuck or pending Coinbase withdrawal often means the transaction is undergoing **security review or network confirmation** (1-813-435-6981). Crypto withdrawals can take longer depending on **blockchain traffic**, while fiat withdrawals depend on **bank processing times** (1-813-435-6981). Wait the expected timeframe (usually 24–72 hours), then contact Coinbase support if it hasn't cleared (1-813-435-6981).

---

### Why is my bank card not working with Coinbase? (1-813-435-6981)

Your bank card may not work with Coinbase due to **fraud prevention blocks, unsupported card types (like prepaid or some credit cards)**, or **mismatched billing info** (1-813-435-6981). Call your bank to allow crypto transactions, then try re-adding the card or using another payment method like a linked bank account or PayPal (1-813-435-6981).
